We're All Gonna Die!

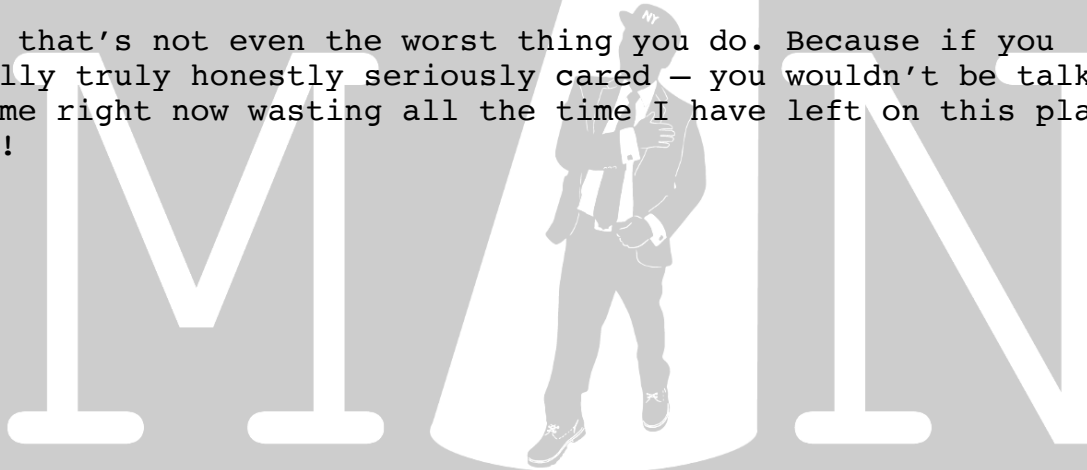

Amber lets it known that not caring is a fate worse than death.

We're all gonna die!

What do you mean am I serious...? Don't "Amber" me. Yes, I'm serious. As serious as the rising sea levels. As serious as the pollution filling our lungs. As serious as skin cancer.

We're dying and it's like no one even cares. Why doesn't anyone care? Don't you care? No, you don't. Because if you cared – really cared – you wouldn't drive that car – you wouldn't eat that slop – you wouldn't buy that brand and you definitely wouldn't be smoking that – you wouldn't, you wouldn't dispose of that trash like that!

And that's not even the worst thing you do. Because if you really truly honestly seriously cared – you wouldn't be talking to me right now wasting all the time I have left on this planet! Bye!
